AI USE DISCLOSURE

AI TOOL USED: Claude (Anthropic)

HOW IT WAS USED

Used Claude to explain the instructions of Asynchronous Activity No. 3 and to help with parts I was unsure of, such as the IUPAC naming rules and how to use The Alkane. Claude also drafted the portfolio cards (the numbered parents, naming trails, typed names, formula counts, and card layout) which I then converted into a design using Canva, I also then reviewed and checked in The Alkane.

I remain fully responsible for the correctness of every name, structure, and formula in this submission, as required by the CHEM 13 syllabus.
